Employee Confidence Index

The Spherion Employee Confidence Index rose 0.7 points to 46.9 in May, showing the first increase seen in nine months. The Index, which measures workers' confidence in their personal employment situation and optimism in the macroeconomic environment, reveals that workers are more optimistic about the economy, despite slight declines in confidence in workers' personal employment situation.

5 Macroeconomic Optimism

Job Availability

More Jobs: 12%
Neutral: 31%
Fewer Jobs: 58%

Economy

Getting Stronger: 7%
Staying the same: 22%
Getting weaker: 71%

Personal Confidence

Confidence in Future of Current Employer

Confident: 64%
Neutral: 24%
Not Confident: 12%

Ability to Find New Job

Confident: 51%
Neutral: 31%
Not Confident: 18%

Job Security

Likelihood of losing job or job elimination in the next 12 months

Unlikely: 75%
Neither unlikely nor likely: 12%
Likely: 13%

Job Transition

Likelihood of looking for a job in the next 12 months

Likely: 35%
Neither unlikely nor likely: 11%
Unlikely: 54%

About the Spherion Employment Report

As part of the Spherion® Emerging Workforce® Series of employment surveys, the monthly Spherion Employment Report provides a snapshot of the latest workforce trends across the country and is issued in conjunction with state and national labor market releases. Three key indices are measured: the *Spherion Job Security Index*, which captures how likely respondents think it is that they will lose their job or that their job will be eliminated in the next 12 months; the *Spherion Job Transition Index*, which captures how likely respondents are to look for a new job in the next 12 months and the *Employee Confidence Index* that measures employees' overall confidence in the economy, their employer and their ability to find other employment. The Employee Confidence Index is calculated from the results of four components that reflect these aspects of employee confidence. For each component item a 'score' is calculated by taking the difference of the percentage of positive responses and the percentage of negative responses. These four scores are then averaged to indicate an overall level of employee confidence, with each score ranking on a scale from 0 (no confidence) to 100 (complete confidence). A reading above 50 indicates a positive confidence level.

Methodology

This May 2008 Spherion Employment Tracker was conducted online within the United States by Harris Interactive on behalf of Spherion Corporation between May 7-9 and May 12-14, 2008 among a U.S. sample of 2,604 employed adults, aged 18 years and older (April 2008 n=2,836). Results were weighted as needed for age, sex, race/ethnicity, income, education and region. Propensity score weighting was also used to adjust for respondents' propensity to be online.

All sample surveys and polls, whether or not they use probability sampling, are subject to multiple sources of error which are most often not possible to quantify or estimate, including sampling error, coverage error, error associated with nonresponse, error associated with question wording and response options, and post-survey weighting and adjustments. Therefore, Harris Interactive avoids the words "margin of error" as they are misleading. All that can be calculated are different possible sampling errors with different probabilities for pure, unweighted, random samples with 100% response rates. These are only theoretical because no published polls come close to this ideal.

Respondents for this survey were selected from among those who have agreed to participate in Harris Interactive surveys. The data have been weighted to reflect the composition of the U.S. adult population. Because the sample is based on those who agreed to be invited to participate in the Harris Interactive online research panel, no estimates of theoretical sampling error can be calculated.

About Spherion

Spherion Corporation (NYSE: SFN) is a leading recruiting and staffing company that provides integrated solutions to meet the evolving needs of companies and job candidates. As an industry pioneer for more than 60 years, Spherion has sourced, screened and placed millions of individuals in temporary, temp-to-hire and full-time jobs.

With approximately 700 locations in the United States and Canada, Spherion delivers innovative workforce solutions that improve business performance. Spherion provides its services to more than 8,000 customers, from Fortune 500 companies to a wide range of small and mid-size organizations. Employing more than 300,000 people annually through its network, Spherion is one of North America's largest employers.
